-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5, 7, 9, and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ferguson in view of Aumiller.

Ferguson shows an extractor tool that contains all of the limitations as broadly as recited in the above claims except that its ridges are not disclosed as being parallel to the outer opposing side surfaces of the grippers.

However, Aumiller shows a lifting tool having a pair of grippers (7,8) each with sharpened ridges extending generally parallel to the outer opposing surfaces of each gripper and parallel to the longitudinal axis of the rod being lifted.

Accordingly, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide each of Ferguson's grippers (11) with a plurality of sharp ridges extending parallel to the outer opposing side surfaces of each gripper similar to that shown in the Aumiller patent in order to more securely engage the surface of certain shaped articles being handled.

***Allowable Subject Matter***

3. Claims 6 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
